Product Leader — AI Agents, Conversation Intelligence & SMB Platforms

Product leader with 10+ years building AI products where reliability, trust, and outcome quality drive adoption. Launched Intuit's first AI agent platform to help small businesses find, qualify, and engage leads, and led conversation intelligence, revenue intelligence and AI-guided selling products at Outreach and HubSpot. Deep expertise in AI agents, evaluation (LLM judges, human-in-the-loop), and customer lifecycle and GTM workflows—turning complex, real-world SMB and enterprise operations into simple, scalable product experiences.

EXPERTISE

GenAI, LLMs & Agents · AI Evaluation, Observability & Trust · 0→1 AI Product Strategy & Experimentation (SQL) · Decision Intelligence · Revenue Platforms (CRM, Sales & Marketing) · Human-AI Collaboration · B2B Roadmap, Positioning & GTM

EXPERIENCE

Senior Product Manager, Outreach — Atlanta, USA (2025–2026)

- Led strategy and launch of AI Topic Explorer, transforming thousands of enterprise customer conversations into real-time, outcome-linked insights—including win-rate drivers—for revenue teams.
- Designed end-to-end orchestration across conversation data, CRM, semantic topic detection, and LLM synthesis, with evaluation systems and LLM judges ensuring consistency and explainability.

Staff Product Manager, Intuit — Atlanta, USA (2024–2025)

- Incubated and launched Intuit's first AI agent platform, helping small businesses identify, prioritize, and engage high-value leads—owning roadmap and go-to-market from alpha (four weeks) to **1,000+ users** within three months.
- Improved agent accuracy from **~60% to ~90%** via orchestration, evaluation, and human-in-the-loop feedback; enabled **\$400M+** in new business opportunities through AI-powered referral workflows.

Senior Product Manager, HubSpot — Remote, USA (2020–2024)

- Led product strategy across conversation intelligence, sales engagement, deal management, and analytics platforms used by thousands of organizations—setting multi-year roadmaps with engineering, design, and go-to-market stakeholders; AI-guided selling surfacing priorities, recommendations, and next-best actions.
- Drove a **20-point increase** in Deals adoption through experiment-driven onboarding (A/B), workflow personalization, and AI-assisted experiences—improving activation and retention for B2B teams.

Product Manager, LEVERTON & McMakler — Berlin, Germany (2017–2019)

- Early product hire at LEVERTON (acquired by MRI Software), a deep-learning startup extracting structured data from legal documents—shipped its most-used review feature, cutting review time **15%**; then built McMakler's online booking platform, lifting appointments **20%** and revenue **~15%**.

Equity Research Associate, Credit Suisse (Doug Paul Scholar — merit program) — New York, USA (2015–2016)

- Covered Tesla and U.S. electrification and industrial-automation names—built the financial models and multi-input investment theses behind published research. The training in disciplined capital-allocation judgment that Portfolio OS now systematizes.
